

Post Storm Activities

Following heavy winds and rains the following actions should be taken:

- Collect loose debris and pile in right of way areas off the roadway. Do not pile near fire hydrants or on storm inlet tops.
- Report and avoid contact with standing water. Heavy rains, at times, can cause sewer overflow, contaminating stormwater.
- Report downed trees or any other obstructions in roadways.
- Avoid contact with and report downed power lines.
- Report storm drain blockages.
- Report downed street or traffic signs.
